

## PRESS RELEASE

### Perception re-invents linear TV streaming with its unique & innovative fully managed TVCDN

- **First unified CDN to natively embed advanced online video functionality**
- **Catch-up-TV instant replay available directly in player & in EPG**
- **Flexible monetization options both inbuilt and via API integration**
- **Success based pricing - low setup and revenue share options**

**London | 22<sup>nd</sup> June 2022:** Perception Group announce that they are launching a fully managed TV CDN with natively embedded advanced online video functionality . Perception TVCDN offers advanced TV features not normally available via traditional CDNs including linear channel streaming that automatically generates Catch Up TV, removing expensive and time-consuming post production requirements.

**Perception TVCDN™** delivers high end IPTV functionality for the OTT market, including live streaming, Catchup TV, VOD, Network PVR.

Delivered within a fully managed service environment, advanced features include:

- Integrated video streaming within its proprietary TVCDN
- 12 native white label multiscreen apps
- Instant visual rewind for live and on demand TV
- Right to left UI for Arabic languages
- In-built, algorithm driven, playout generator, enabling auto-production of genre linear TV channels including with auto-EPG; an essential feature to easily generate bouquet of channels delivered as FAST (free to view ad assisted TV)
- Ad funded, subscription and transactional monetisation options
- Success based pricing with no per TB CDN fees or OVP licensing

Features like this and many more, will give channel and content owners a quick, easy and state of the art online service in conjunction with cost effective and success based pricing.

**Gregor Fuis, Perception Group CTO said:** “We are very excited about this next stage in the evolution of the Perception platform. Our mature software has been powering live customer installations with 99.999% uptime for many years. The fully managed next-gen Perception cloud infrastructure is in final testing and will be available to clients in Q4-22 supporting the ever increasing number of customers who want a professionally managed

and the most advanced OTT video service inclusive of content sourcing and global distribution.”

### **About Perception Group Inc.**

Perception Group Inc. is an industry innovator that develops and operates TVCDN cloud services utilising its bespoke product, Perception TVCDN. The first multiscreen TV platform that delivers live streaming TV, auto TV channel playout generator, catch-up TV, cloud PVR, video on demand, subscriber management and billing services embedded directly in a unified TVCDN purpose-built for multiscreen IPTV & OTT.

Perception TVCDN™ is a proven product, in continuous development and commercial use for over 17 years, available as an on-premise SaaS solution for operators who wish to self-manage infrastructure or as PaaS fully managed solution for those who wish to outsource the complete whitelabel operational platform. Perception TVCDN is ideal for Telcos, ISPs, broadcasters, channel and content owners looking to provide global or local TV services on managed network or OTT.
